

Programming

Exercise 1:

Write VB.NET program to allow the user to input two integer values and then the program print the results of adding, subtracting, multiplying, and dividing among the two values.

Exercise 2:

Write a program to ask the user to enter their age. If their age is under 18 then say "Sorry, this film is not for you".

Exercise 3:

Write a program to ask the user for two numbers. Compare the first with the second and then print out one of three messages. Either the numbers are equal, the first is bigger, or the second is bigger. You will need more than one IF to solve this one.

Exercise 4:

Write a program which asks the user to enter their password. If they enter the word "PASSWORD" then display the message "Welcome to the treasure", otherwise display a message which says "go away, it's all mine".

Exercise 5:

Write a program that divides a number entered by the user by 2.
